SEO / GEO / AEO Audit Report

BRAMPTON-FIRST LOCAL SEARCH STRATEGY

FULL WEBSITE CONTENT AUDIT

9 November 2026 | 208 indexable route candidates

SEO	GEO	AEO
5 / 10	6 / 10	6 / 10
Needs attention	Developing	Developing

Prepared for Commonwealth Migration Group

Executive Summary

The site has a valuable Brampton foundation: an identifiable local office, a named RCIC, a broad service catalogue, and useful immigration explainers. The main ranking opportunity is to give one URL clear ownership of the commercial query “immigration consultant in Brampton,” then build genuine local prominence around it. The office page’s visible keyword lists and the overlap between four Brampton-facing URLs are the first fixes. The same editorial review should trim generic page-template additions and reassess the 18 city pages for real local value.

Scope: 208 unique indexable route candidates reconstructed from the project page registry and sitemap source on 9 November 2026. The live homepage and key Brampton pages were spot-checked. This is a content and local-search audit, not a measured rank, traffic, backlink or Core Web Vitals report.

Dimension	Score	Status	Key takeaway
SEO	5/10	Needs attention	Strong route depth; local intent overlap, keyword stuffing and generated filler are the urgent risks.
GEO	6/10	Developing	Named RCIC, CICC proof and official-source links exist; add more original expertise and verified local proof.
AEO	6/10	Developing	Useful FAQs and direct-answer patterns exist; remove generic questions and use FAQs for users, not assumed rich snippets.
Combined	17/30	Content review	Qualitative content and source review; not a ranking, traffic or technical performance score.

The Brampton strategy in one sentence

Make one real Brampton page the commercial destination, make the homepage and office/about pages establish brand and trust, use articles to answer narrow informational questions, and earn prominence through a complete eligible Business Profile, genuine reviews and real local references. Content alone cannot overcome distance or guarantee a map-pack position.

What to fix first

- Confirm the winning Brampton URL from the last 16 months of Google Search Console query/page data and referring links. The default recommendation is /locations/brampton because its current page title/H1 target the local service intent; switch the winner if the office URL demonstrably has stronger signals.
- Remove the keyword-stuffed copy from the old office page, reassign the homepage away from the same primary local query, and make the Brampton article a genuine how-to guide.
- Inspect content generated by shared SEO templates. On live local pages, generic prompts such as “What does this eligibility comparison show on the Immigration consultants in Brampton page?” are visible and should not remain as visitor copy.
- Audit all 18 non-Brampton city pages against doorway risk. Keep only pages that help a real audience with materially unique, accurate local guidance; never claim an office where there is none.

Page-level SEO / GEO / AEO findings

SEO is the organic search foundation; AEO is structuring useful answers for question-led search; GEO is making facts, sources and entities clear to answer-generating systems. Google’s current guidance treats conventional SEO as the foundation for AI search visibility and does not promise a special GEO markup advantage.

Signal	Observed evidence and exact interpretation	Status
Local query ownership	Homepage, /locations/brampton, /about/immigration-office-brampton-ontario and the Brampton consultant article all overlap commercially. Pick one local service URL; make the other pages support separate purposes.	High
Policy / quality risk	The office page visibly lists dozens of disconnected keywords, cities and “best/top/free” phrases. Remove the list and rewrite for a real visitor’s decision.	Critical
Template copy	Shared page rendering injects additional search-intent blocks across service pages. Live Brampton pages show boilerplate prompts that literally refer to “this page.” Keep only useful, route-specific material.	High
Local footprint	There is one verified physical-office claim in Brampton and 18 city service pages. Remote service is legitimate; city pages must not imply local offices or exist as city-name doorway pages.	High
Trust and experience	The homepage and About content identify Pankaj Khanna, RCIC, and a CICC licence. Make the current register profile, review date, service scope and real practitioner contribution visible on relevant pages.	Medium
Search measurement	No Google Search Console or GBP performance export was available, so historical URL ownership, actual traffic, clicks, rank, leads and cannibalization cannot be confirmed.	High
Keyword metrics	Current SERP spot-check shows several Brampton providers. No reliable volume/KD values were returned by connected keyword tools; long-tail candidates below are not labelled with invented metrics.	Medium
AI / answer visibility	Google says standard SEO, clear crawlability, useful unique content and correct visible data remain the foundation; no special GEO schema guarantees placement.	Medium

Local query and URL ownership

Page role	Assigned intent	What belongs on it
Brampton service hub — default /locations/brampton	“immigration consultant in Brampton”; licensed/RCIC, consultation, service variants	One clear answer, real address/appointment proof, consultant and licence verification, specific service options, local FAQs, booking. Confirm incumbent URL in GSC before redirecting anything.
Homepage /	Brand + Canada-wide immigration consultation; local business entity evidence	Company identity, core service summary, named RCIC and one concise factual Brampton reference; link to local hub. Avoid same exact local commercial title/H1 as the landing page.
Office route /about/immigration-office-brampton-ontario	Office access/contact details only, if kept separately	Prefer merge + 301 to winner once signals are checked. Remove keyword blocks; no competing service-guide sections.
Brampton selection article /blog/immigration-consultant-brampton	How to choose, verify and compare a Brampton consultant	Retain informational how-to intent; transparent criteria and CICC links; avoid claiming “top” or “best” without auditable evidence; contextual service link.
Other Brampton articles	Narrow question intent such as OINP, work permit expiry, PGWP, citizenship or fees	Keep each article’s current useful topic keyword; add only substantiated local facts; link to one service destination when appropriate.
Other city pages	Remote service information and province-specific pathways	Do not represent an office. Keep only unique local utility, or consolidate into province-level guide / noindex where appropriate.

Brampton keyword strategy and intent map

The exact commercial term is a competitive local target: a current organic SERP spot-check returned several Brampton immigration firms, including Gera Immigration, Northern Arc, BIC Canada, RNR and Woodstone. That is a directional snapshot, not a rank tracker or keyword-difficulty measurement. Google describes local results in terms of relevance, distance and prominence; a website cannot change the searcher’s distance from the office.

Cluster / priority	Target page	Keywords to retain or test	Execution note
Commercial head term — high intent / competitive	/locations/brampton	immigration consultant in Brampton; immigration consultants in Brampton; licensed immigration consultant Brampton; RCIC Brampton	Own on one URL only. “High intent” is based on query meaning; volume/KD not measured.
Local service variants — narrower / likely lower relative difficulty, metrics unverified	/locations/brampton + existing service pages	OINP consultant Brampton; work permit consultant Brampton; spousal sponsorship consultant Brampton; Brampton immigration office appointment	Use only where the page answers the matching service question. Avoid separate thin landing pages.
Trust / verification questions — informational	/blog/immigration-consultant-brampton	how to verify an immigration consultant in Brampton; CICC licensed consultant Brampton; what to ask before hiring an immigration consultant	Write a plain answer, link directly to the CICC public register and Government of Canada representative guidance, and link to the service hub.

Cluster / priority	Target page	Keywords to retain or test	Execution note
Cost / consultation decision	Existing cost guide: /blog/immigration-consultant-cost-ontario-brampton	immigration consultant fees in Ontario; immigration consultant cost Brampton; what to ask about an immigration retainer	Explain that fees depend on service scope; differentiate consultant fees from government/testing costs. Don't promise free help unless the offer is current and clearly scoped.
OINP / employer long-tail	/immigrate/ontario-pnp-oinp and the OINP Brampton article	Ontario PNP; OINP; Ontario Workforce Priority stream; Ontario PNP eligibility; OINP employer requirements; OINP TEER 4 and 5 requirements; OINP consultant Brampton	Keep client-provided high/moderate OINP terms on the OINP guide. Add Brampton only as contextual service access. Keep eligibility and invitation distinct.
Permit and status problem queries	Relevant Brampton articles + exact service pages	work permit expiry and maintained status Brampton; change DLI Canada Brampton students; PR after PGWP Brampton	Preserve each article's specific informational target. Add current IRCC source/date and only local evidence that genuinely changes the reader's decision.

Keyword metrics caveat: no monthly volumes or keyword difficulty values are asserted. The connected Ahrefs project metric returned an insufficient-plan response and the Semrush free checker did not return query metrics. Treat the narrower terms above as research candidates selected from intent, existing client targets and SERP inspection—not verified "low-competition" keywords. Validate them with Search Console, Keyword Planner/Ahrefs when available, then route each query group to one page.

Exact local execution plan

Timing	Actions	Evidence of completion
Days 1–7: choose the owner	Export 16 months of GSC queries and landing pages; compare /, /locations/brampton, /about/immigration-office-brampton-ontario and /blog/immigration-consultant-brampton. Inspect backlinks/mentions before URL changes. Select the commercial owner; write a keyword-to-URL map.	One selected URL owns the head term support URLs each have distinct intent redirect until data review.
Week 1: remove the clearest quality issue	Delete the search-phrase blocks from the office page. Review generated SEO sections in the page template and remove prompts, generic checklists and repeated lines that do not help a user decide.	The local pages read naturally without keyword lists or "this page" boilerplate
Weeks 2–3: strengthen local landing page	Put answer and services near the top; provide accurate address, appointment mode, phone, office access, current RCIC profile link, scope/fees process and evidence-based Brampton details. Add 5–8 real FAQs users ask, with concise answers and official links.	One page has consistent NAP and use local evidence; title/H1/meta align with search task.
Weeks 2–4: align trust surfaces	Review the actual GBP eligibility/setup, business name, categories, address/hours, local phone, appointment information, website URL, photos and service area. Align site, CICC, GBP and credible directories.	Accurate real-world business details; r keyword-stuffed business name or city specific duplicate profiles.
Weeks 3–8: earn prominence	Ask all completed clients neutrally for honest feedback; do not incentivize, gate, or solicit only positive reviews. Seek genuine Brampton citations/links through real professional/community relationships, local media or events.	Review requests follow one policy; links/mentions document a real relatio and are not purchased link placements
Weeks 4–12: publish intent-led support	Refresh the strongest Brampton articles and OINP/permit guides with expert review, current official sources and specific local context. Create a new article only when it answers a distinct, evidenced question.	No city-swap pages; each article serve query and links to the right service rou
Monthly: measure outcomes	Review GSC impressions/clicks/CTR by Brampton query and URL; GBP profile interactions; qualified calls/forms in GA4/CRM; and local rank-grid visibility from fixed Brampton points.	Measure visibility and qualified leads separately. Change one mapping/cont element at a time and annotate date.

Local and Google policy guardrails

Google says local ranking is mainly based on relevance, distance and prominence. Keep one Business Profile for the genuine office unless the business has additional staffed, eligible locations. Use the real-world business name, accurate categories and location/service-area setup. Do not append “immigration consultant Brampton” to the GBP name unless it is genuinely part of the registered real-world name. Google’s guidelines say a virtual office is not eligible and an address where customers are received should be staffed during stated hours.

Ask every client for an honest review without a reward, review gating or pressure to write a positive rating. Build citations and links from real professional and community activity. Google’s spam policies identify doorway abuse for substantially similar pages targeting city variations and scaled content that exists mainly to manipulate rankings. The 18 city pages therefore need a genuine page-by-page value check; their existence alone is not proof of a violation.

People-first content should answer an audience’s real question, demonstrate expertise, use original/accurate detail, and avoid search-engine-first repetition. For AI Overviews and other answer systems, keep important information crawlable and visible, state claims clearly, cite official sources, and keep structured data aligned with the page. FAQ copy can help visitors, but a commercial immigration site should not expect Google FAQ rich results.

Measurement and constraints

Available in this review	Not available / not claimed
Source registry: 208 unique sitemap-route candidates from 96 content JSON pages, 6 Markdown routes, 3 distinct about pages, 19 location pages, 4 legal pages, 11 explicit app routes and 72 blog posts (with 4 overlaps/deduplications).	Live sitemap.xml/robots.txt response, Search Console query/page exports, GBP Performance, GA4/CRM conversions, keyword volume/KD, local pack rank grid, backlink index, Core Web Vitals/PageSpeed or formal schema validation.
Live spot-check: homepage, /locations/brampton, /about/immigration-office-brampton-ontario, /blog/immigration-consultant-brampton; source-level review of content/route templates and metadata.	A guarantee of rankings, time-to-rank, clicks or traffic lift. A “low competition” claim for any keyword without a returned metric.

The public XML endpoints could not be read by the browser research tool; the 208 count is from the project’s route/sitemap generation source and must be reconciled with the live Search Console Page Indexing report before deletions or redirects.

Priority Recommendations

Priority	Issue / action	Dimension	Effort	Impact
P0	Select one Brampton commercial landing URL using GSC clicks/impressions and backlink data; map all other local pages around it.	SEO	1-2 days	Very high
P0	Remove keyword/location lists from /about/immigration-office-brampton-ontario; preserve facts and merge them into the canonical local page.	Policy / content	1 day	Very high
P0	Edit homepage title/H1 emphasis so the homepage is not a second “immigration consultant in Brampton” landing page.	SEO	1 day	High
P1	Review and trim generated content on all non-authored service pages; remove query-shaped generic blocks and duplicate checklists.	SEO / GEO / AEO	1-2 weeks	Very high
P1	Rework the 18 city pages: keep Brampton as a real office page; materially improve remote pages or consolidate/noindex thin pages.	Local / policy	1-3 weeks	Very high

Priority	Issue / action	Dimension	Effort	Impact
P1	Complete and verify the one eligible Google Business Profile; align its real-world name, category, address/hours, phone and appointment facts.	Local	1 week	High
P1	Rewrite the Brampton consultant article as a transparent selection/verification guide; stop implying an unevidenced “top” ranking.	SEO / trust	1 day	High
P2	Create ethical review and local-link routines based on real completed client experience and genuine Brampton relationships.	Prominence	Ongoing	High
P2	Add reviewed-by/date/official sources to high-traffic immigration pages; update rules when IRCC / provincial notices change.	GEO / trust	Ongoing	High
P2	Track query-to-URL ownership, local grid visibility, qualified leads and GBP actions monthly.	Measurement	Monthly	High

What is working well

Strength	Evidence and how to build on it
Clear local business basis	Homepage identifies Commonwealth Migration as based in Brampton and gives a local, online service proposition. Keep that factual distinction consistent across the site.
Expert and credential signals	Public site copy names Pankaj Khanna, RCIC, and links to CICC verification. Repeat this proof where it helps a user evaluate service, and keep it current.
Useful national topic coverage	The registry contains a broad service and program library, tools, current draw pages and 72 articles. It gives the local page strong supporting material when each URL serves a distinct intent.
Answer-oriented material	Homepage and core service pages include FAQs, checklists and process steps. Preserve the concise answers that solve real questions; trim repetitive/template-only questions.
Existing Brampton-specific content	The city route and Brampton article cluster cover OINP, permits, students, sponsorship, citizenship, costs and consultant verification. Route that coverage by intent rather than repeating the same sales query.

Glossary

Term	Meaning in this report
SEO	Search Engine Optimization: helping people and search engines discover and understand a page for a relevant search.
AEO	Answer Engine Optimization: presenting a direct, useful answer in a format that search systems and people can understand quickly.
GEO	Generative Engine Optimization: making relevant facts, expertise and sources clear to systems that synthesize answers; there is no guaranteed special markup or ranking shortcut.
NAP	Name, address and phone details; they should accurately match the real business across its website and legitimate listings.
Keyword cannibalization	When multiple pages on one site target substantially the same intent and compete for the same query; fix by clarifying page roles and internal links, not by deleting helpful pages blindly.
Doorway-page risk	The risk that similar location pages are made mainly to capture city queries and funnel users to the same destination without unique utility. A risk finding is not a Google penalty determination.

Page-by-page audit: all 208 indexable route candidates

Each row lists the current route topic/target visible in the site registry and a page-specific next action. P0/P1 routes should be handled before broad content expansion. “Keep” means protect the page’s distinct intent while improving its evidence and usefulness; it does not mean that no editing is needed.

Brampton priority pages and local entity

Priority	URL / current page title	Current target / intent	Exact recommendation
P0	001 / Licensed Immigration Consultant in Brampton, Ontario	**Canada immigration consultant / brand; currently also targets Brampton** Existing terms: licensed RCIC immigration consultant Canada	Keep the homepage as the brand and Canada-wide service overview. Change its title/H1 emphasis away from the same Brampton commercial query owned by the local landing page; retain one factual Brampton-office mention, RCIC identity and a prominent link to /locations/brampton. Audit the homepage guide and Q&A for repeated template copy. **Priority P0**
P2	002 /about/about-commonwealth-migration About Commonwealth Migration | Licensed RCICs in Brampton	**About Commonwealth Migration**	Keep this as the organization, people, licence, service scope and process evidence page. Use named consultant credentials, a current CICC profile link, real team biographies and clear no-guarantee language. Link to the Brampton service hub; avoid competing with its local transactional title. **Priority P2**
P2	003 /about/canada-immigration-consulting-process Canada Immigration Consulting Process | Commonwealth Migration	**Our Canada Immigration Consulting Process**	Own the “what happens during a Canadian immigration consultation” process intent. State who performs each step, what is included, fees/retainer boundaries and deadlines; link the Brampton local query to the single Brampton service page. **Priority P2**
P0	004 /about/immigration-office-brampton-ontario Commonwealth Migration Group Brampton, Canada | Office	**Brampton office, address, appointment and contact**	P0 content cleanup: remove the visible blocks of search phrases, competitor/city terms and “best/top/free” queries. Merge verified address, phone, appointment, CICC verification and office-access facts into the chosen Brampton hub. Then 301 redirect this URL to the winner after checking GSC and referring links; if this URL has stronger historic signals, reverse the winner and redirect /locations/brampton instead. **Priority P0**
P0	005 /blog/immigration-consultant-brampton Top Immigration Consultants in Brampton: Guide	**How to choose and verify a Brampton immigration consultant** Existing terms: immigration consultants in Brampton; best immigration consultants in Brampton; immigration agency Brampton	Retitle and describe this as an informational guide (“How to Choose an Immigration Consultant in Brampton: Credentials, Fees and Fit”). Its H1 already says “Choosing the Right…”, while its current metadata promises “Top Immigration Consultants” without presenting an evidenced ranked list. Keep the how-to intent, CICC verification steps, comparison criteria and link to the Brampton service page. **Priority P0**
P1	006 /locations Immigration consultants across Canada	**Find current service coverage and the real Brampton office**	Explain accurately that Brampton is the physical office and other listed cities are served remotely unless verified otherwise. Make the index a useful navigation page and link to provincial guides; do not imply 18 physical offices. **Priority P1**
P0	007 /locations/brampton Immigration consultants in Brampton | CMG	**Immigration consultants in Brampton; local RCIC services** Existing terms: immigration consultants in Brampton; OINP Brampton; immigration consultant Brampton	Make this the default Brampton commercial landing page, subject to a 16-month Search Console and backlink check. Own “immigration consultant in Brampton” plus natural licensed RCIC/appointment/service variants. Add verified NAP, appointment details, consultant/CICC profile, original Brampton service evidence, specific pathway choices, concise direct answers and a clear booking CTA. Link here from the homepage, office/contact information and relevant Brampton articles. **Priority P0**

City service pages

Priority	URL / current page title	Current target / intent	Exact recommendation
P1	008 /locations/calgary Immigration consultants in Calgary | CMG	**Calgary immigration support; AAIP pathways** Existing terms: immigration consultants in Calgary; AAIP Calgary; immigration consultant Calgary	This is a remote-service city page, not evidence of a local office. Keep only if it gives materially useful, verified Calgary/Alberta guidance beyond swapping the city name: current AAIP route fit, local evidence, credible source and remote appointment details. Otherwise consolidate it into the relevant provincial page or remove it from the index; never create a fake local profile/address. Link to /locations/brampton only where the real Brampton office is relevant. Priority P1

About the audit boundary

Page inventory was assembled from the route data and sitemap-generation sources in the project. The count includes the visible sitemap candidates, not a claim that Google has indexed all 208. Live XML sitemap and robots endpoints were unavailable to the browser research tool. Search Console, GBP analytics, web analytics, PageSpeed and full backlink/keyword data were not connected; any URL migration should be preceded by those checks.
